Personal statement

I'm Stefan Anghel, an aspiring software developer. With a bachelor degree in Mechanical Engineering, I bring a unique problem-solving perspective to coding.

My journey led me to AWS Cloud, where I developed a knack for creating efficient solutions in the cloud environment. I then dived into a Java Bootcamp, refining my coding skills and igniting my passion for web development.

Currently immersed in web development, I'm exploring the ever-evolving tech landscape. My goal is to craft user-centric applications that redefine digital experiences.

Key Skills

- **Technical skills:** - HTML, CSS, Bootstrap, JavaScript, GitHub;
- **Continuous Learning** - Commitment to continuous learning and development;
- **Time Management** - working as a delivery driver often requires efficient time management skills to meet delivery deadlines;
- **Attention to detail** – working as a quality assurance technician demands a keen eye for detail;
- **Adaptability** – ability to adapt to changing circumstances, flexibility and willingness to learn new technologies and programming languages;
- **Problem-solving** – as a quality assurance technician I have developed a strong problem-solving skills while identifying resolving issues;
- **Communication** – Effective communication with team members and collaborate;
- **Teamwork** – previous jobs required working in a team which helped me collaborate more effectively with work colleagues;

Employment History

Delivery Driver, Uber Eats, Saint Helens

(October 2020 – Present)

- **Efficiency** - optimizing delivery routes to complete more deliveries in less time;
- **Time Management** - ability to manage time efficiently to meet delivery deadlines;
- **Record-Keeping** - attention to detail in maintaining accurate records of deliveries, payments, and expenses for accounting purposes;
- **Problem Solving** - handled various challenges, such as traffic, parking issues, or incorrect orders, ability to adapt and find solutions;

(February 2020 – September 2020)

- **Team Collaboration** - ability to work effectively in a team environment, as collaboration is crucial in a warehouse setting;

Quality Inspector, Plastic Omnium, Warrington

(September 2019 – January 2020)

- **Documentation** - maintained detailed records and documentation of inspection results;
- **Teamwork** - ability to collaborate effectively with colleagues and supervisors to ensure quality standards were met;
- **Problem-solving** - ability to identify issues, troubleshoot problems, and make decisions in a fast-paced quality control environment;
- **Time Management** - ability to manage workload efficiently and meet inspection deadlines.

Delivery driver, Hermes, Liverpool

(February 2019– August 2019)

- **Organization** - organizational skills in arranging parcels in a manner that minimizes the time spent searching for specific items in the delivery van;
- **Adaptability** - ability to adapt to changing circumstances, such as handling increased delivery volumes during peak seasons;
- **Communication** - communication skills, especially when dealing with customers, colleagues, and supervisors;

Delivery driver, Amazon, Liverpool

(November 2018 – February 2019)

Quality Technician, Horizon Global, Brasov, Romania

(July 2016 – October 2018)

- **Defect Reduction** - reducing defects or improving product quality;
- **Training and Mentoring** - involved in training and mentoring junior staff or colleagues;
- **Supplier Quality** - involvement in supplier quality management, monitoring supplier performance, and ensuring the quality of incoming materials;

Education

Meta Front-End Developer Professional Certificate

(July 2023– Present)

- Create responsive website using **HTML**, **CSS** and **JavaScript**;
- Learn **Bootstrap** CSS Framework to create webpages and work with **GitHub** repositories;
- Learn **React** in relation to JavaScript libraries and frameworks;
- Learn best approaches to problem-solving;

QA Academy Boot Camp

(August 2022– December 2022)

- **Course Completion** - I successfully completed a 3-month full-time online Java programming course with QA;
- **Object-Oriented Programming** - knowledge of how to create and work with objects and classes in Java;
- **Software Development Lifecycle** - covered software development methodologies or practices, such as Agile or Scrum;
- **Collaboration** - collaborated with peers on projects or group assignments;
- **Communication with Tutor** - interactions you had with tutor, such as asking questions, seeking clarification, or requesting additional help when needed.

AWS re/Start Programme

(March 2022– June 2022)

- **AWS Services** – proficiency with AWS services, such as EC2, S3, RDS, Lambda, and others;
- **Cloud Computing** – understanding of cloud computing concepts, including scalability, security and cost management;
- **Networking** – concepts like VPC configuration and security groups;
- **Databases** – experience with AWS database services like Amazon RDS or DynamoDB;
- **Programming** – Python fundamentals;
- **Security** – understanding of AWS security best practices;
- **Collaboration** – during the programme have worked in small teams to make different projects;
- **Soft Skills** – improved skills like communication, adaptability and work ethic;
- **Certifications** – earned a AWS Cloud Practitioner certification.

Master studies in Road Safety, Transport and Interaction with the Environment, University of Brasov

(October 2016 – July 2018)

Bachelor of Transport and Road Traffic Engineering, University of Brasov

(October 2012 – July 2016)
